Hawthorne Cat Announces New Cat D3 Series Loaders

Cat 262D3 Series Skid Steer and 299D3 Compact Track Loaders Now Available

San Diego, CA -- Hawthorne Cat®, the exclusive Cat® equipment dealer in San Diego, the Hawaiian Islands, and the Pacific Region, introduces the new D3 Series skid steer and compact track loaders. The Cat D3 Series loaders advance our previous models' excellent reputation for quality, comfort, and performance.

The Cat 262D3 Skid Steer Loader and 299D3 Compact Track Loader feature several improvements in operator control and performance. With a wider door opening and more space in the sealed cab, the new D3 Series loaders provide a more comfortable operating experience. Intuitive joystick buttons and machine controls allow operators to focus on the job at hand without slowing down.

Our industry-first line of Smart technology recognizes attachments and converts the machine controls to match the attachment for increased machine utilization, work tool control, and jobsite visibility. New industrial performance buckets offer additional capacity and productivity with more material moved per pass. Our performance-tuned undercarriage and torsion axles also reduce machine pitching and rocking, while maintaining superior ride comfort.

"The D3 Series skid steer and compact loaders were expertly designed with operators in mind," says Ross Farmer, Corporate Machinery Sales Manager. "New comfort-focused features, performance improvements, and Smart technology come standard with our Cat D3 Series loaders to deliver an unmatched operator experience."
