Expires June 30, 2022

MATCH THE TIP TO THE JOB

You've got options based on what you need the tip for. Choose a tip that's right for your task – balancing cost with the performance your application demands.

General Duty:

Ideal for small to medium-sized excavators and wheel loaders operating in low-to-medium impact conditions. Lower cost than Heavy Duty J Tips – but just as dependable when used for general construction duties.

Heavy Duty J:

Great for medium-sized excavators and wheel loaders operating in high-impact, highly abrasive conditions

CONSIDER THE POWER OF TIP SHAPES

GENERAL DUTY		HEAVY DUTY J	
<p>Standard Long Balances penetration, strength, and abrasion resistance for versatility at a reasonable cost</p> 	 <p>Heavy Duty Abrasion For sand, gravel and shot rock</p>	 <p>Heavy Penetration For high-impact, hard-to-penetrate materials</p>	 <p>Heavy Duty Long Wears around the profile to increase penetration.</p>
<p>Rock Chisel Tip Penetrates easier and resists blunting in medium-impact and high-abrasion applications</p> 	 <p>Long These symmetrical tips are the baseline for other tip styles.</p>	 <p>Penetration Plus Self-sharpen as they wear.</p>	 <p>Penetration For maximum penetration in densely compacted materials.</p>

We're here to help you find the right parts for your application.
