# TRACKOUT CONTROL ENTRANCE

07344050

The FODS Composite Trackout Control Mats can be used as a temporary or semi-permanent anti-tracking solution to prevent offsite tracking and facilitate site compliance. The design of the system provides a highly visible access point that prevents sediment erosion from entering roadways, and reduces fugitive dust and stormwater contamination. Mats can be anchored to asphalt, concrete or any substrate. The surface of the each mat is covered with raised pyramids that actively deform tire treads, trapping sediment and debris at the base of the pyramids before it can leave the site – without damage to the tire.

### **REUSABLE FOR 10+ YEARS**

Effectively Cleans Tires

### EFFECTIVE | DURABLE | NPDES COMPLIANT

- Increased Effectiveness at Reducing Site Trackout
- Crush Rating of 2.8 Million lbs.
- Economical/Reusable
- Excavation Not Required
- Rockless/Easy to Clean
- Portable/Reduces Waste
- Chemical Resistant/UV Stable
- Made in the USA/Recyclable )
- FODS, LLC. | THE MUD STOPS HERE | GETFODS.COM | 1-844-200-3637

### **INDUSTRIES**

Industrial Steel Plant

Batch Plant

Industrial Gypsum Plant

Quarry

Mining

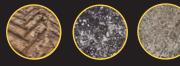

• Waste Transfer Station

- Heavy Civil Construction
- Urban Construction/
- Industrial Manufacturer
- Residential Construction
- END USERS OF FODS
   Land Development
   Electrical
  - Energy Exploration
  - Oil & Gas Pipeline
- Electrical Power-line
- Landfill & Waste Management
- Education Infrastructure
- Mining
- Forestry

## **COMMON SUBSTRATES & LAYOUTS**

FODS TRACKOUT CONTROL SYSTEM should be installed near the site exit point, as close to the location where vehicles enter the roadway as safely as possible. FODS mats should not be installed at a low point on the site where water will pool.

#### **MULTI-TERRAIN**

- Excavated Soil (Min CBR: 4)
- Un-Excavated Soil
- Asphalt
- Concrete

A smart ROI, low long term cost system that configures to any exit.

Alternating pyramids proactively prevent trackout.
