

DEF | SOLUTIONS

IT'S AS EASY AS...

1 Remove CAP on the Engine's DEF Tank

2 Insert UNI-FILL™ Automatic Nozzle

3 Click AUTO START on Controller

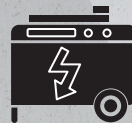

Proprietary UNI-FILL™ Automatic Replenishment System Features...

- Extending Equipment Runtime & reduces fill intervals
- Minimizing engine shutdowns & issues due to lack of DEF
- Complimenting auxiliary fuel tank by giving DEF the same runtime as fuel

DEF Tank Connects Directly To:

Diesel
Generators

Air
Compressors

Pumps

(All brands of Tier 4 engines)
